PROFESSIONAL SUMMARY

Backend developer with 12 years of commercial experience in high traffic e-commerce: online stores, pharmacies and drugstores. Daily work with PHP and Laravel, MySQL, MongoDB and Redis, microservice architecture, integrations with ERP and WMS systems, payment providers and the Polish e-invoicing system (KSeF). For the last two years working AI-first: my own fleet of agents, custom skills and MCP, model integrations built into the product itself. Available immediately.

PROFESSIONAL EXPERIENCE

Backend Developer · [Zdrowit \(melisa.pl, wapteka.pl\)](#) (contract until 01/2027) 01/2021 – present

- Document microservice for invoices, corrections and warehouse documents, handling over 40,000 records per month
- Integration of internal systems with KSeF (the Polish national e-invoicing platform) and with external accounting systems
- Admin panels and APIs connecting pharmacy e-commerce with warehouse and ERP systems
- Query and database architecture tuning (MySQL, MongoDB, Redis), which cut document generation time during order peaks
- Scrum: dailies, planning, architectural decisions taken with the team

Tech stack: **PHP 8.x, Laravel, Horizon, MySQL, MongoDB, Redis, Docker, PHPUnit, Git, OpenSearch**

Senior Full-Stack Developer (joined as a junior) · [Dotandspot](#) 05/2014 – 01/2021

- E-commerce systems: online stores, pharmacies and drugstores
- Integration APIs for ERP, WMS, courier companies and online payment providers
- Migration from PHP 5.x to Laravel and PHP 7.x/8.x
- CMS panels for content and product management, full-stack work

Intern, then PHP Developer · [MIMO Multimedia](#) 11/2013 – 04/2014

- Responsive websites, an in-house CMS, database schemas and dynamic PHP modules

PERSONAL PROJECTS

CV builder (SaaS) (private repository)

A CV builder where the live preview is identical to the exported PDF, because one engine renders both, and after each export the server reads the PDF back to check what reached the file. Tailoring to a job ad is done by a language model under a cost limit and a check on its output.

Stack: **Laravel 13, Livewire 4, MySQL, Redis, Docker, Browsershot, Paged.js, Pest**

AI agent fleet and my own agent server

Over a hundred custom skills and agents running in parallel on isolated repository branches, with tasks routed between models by cost and difficulty and a rule that code is never reviewed by its author. On my own server a duty agent runs in a container, with persistent memory and cron driven jobs.

Stack: [Claude Code](#), [Codex](#), [MCP](#), [Python](#), [Docker](#), [Obsidian API](#)

BajeczkaTV, automated video production

youtube.com/@BajeczkaTV

A YouTube channel with bedtime stories for children and the pipeline behind it: script, TTS narration, illustrations, editing, publishing.

Stack: [AI agents](#), [Python](#), [FastAPI](#), [Docker](#), [model APIs](#)

Own e-commerce platform (work in progress)

An online store built from scratch as a product installed on the customer side: backend API, a Vue admin panel, a storefront and a licence server. Pest and Playwright tests in CI, static analysis, update channels split into functional and security ones.

Stack: [PHP 8.3](#), [Laravel 13](#), [Sanctum](#), [MySQL](#) and [MariaDB](#), [Redis](#), [Docker](#), [Vue 3](#), [Pinia](#), [PrimeVue](#), [TypeScript](#), [Pest](#), [Larastan](#), [GitHub Actions](#)

EDUCATION

M.Sc. Eng., Applied Computer Science, [University of Lodz](#)

2014 - 2017

B.Eng., Applied Computer Science, [University of Lodz](#)

2010 - 2014

COURSES AND TRAINING

Szkoła Security (szkolasecurity.pl) -
cybersecurity, course in progress

2026

SKILLS

Backend

PHP 5.x-8.x (advanced), Laravel, Horizon, REST and SOAP APIs, microservice architecture

ORM

Eloquent (advanced), Doctrine (basics)

Frontend

JavaScript (ES6+), Livewire, HTML5, CSS3, Vue 3 (basics, improving)

Tools

Docker, Git, PHPStorm, Pest, Larastan, GitHub Actions, Playwright

Languages

Polish (native), English B2 in writing and technical documentation, speaking in progress

Databases

MySQL and MongoDB (advanced), Redis, SQL, SQLite, PostgreSQL (SQL and migrations)

AI and automation

Claude Code, AI agents, MCP, custom skills, multi model orchestration, LLM integrations (OpenAI-compatible, cost limits, output validation), a 24/7 agent on my own server

Other languages

Python (automation pipelines and control scripts), Node.js and TypeScript (basics, side projects)

Ways of working

Scrum, Kanban, Clean Code, TDD, code review, CI
